This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

SIGMA NOVAGUARD 200/840 (SIGMA NOVAGUARD) HARDENER

MSDS EU 01 / EN Version 1

Print Date 3/28/2007 Revision date 17-03-07

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Product information		
Trade name	:	SIGMA NOVAGUARD 200/840 (SIGMA NOVAGUARD) HARDENER
Recommended use	:	solvent based, two component coating hardener
Company	:	SigmaKalon Belgium N.V. Tweemontstraat 104 2100 Deurne-Antwerpen
Telephone	:	+32 3 3606311
Telefax	:	+32 3 3606437
Emergency telephone number	:	+31 20 4075210

2. COMPOSITION/INFORMATION ON INGREDIENTS

Components	EC No.	CAS-No.	DSD	Note	Classification	Concentration
benzyl alcohol	202-859-9	100-51-6	19th		Xn; R20/22	>=10.00 - <25.00%
methanol	200-659-6	67-56-1	28th		F; R11 T; R23/24/25, R39/23/24/25	>=0.10 - <1.00%
2,4,6-tris- (dimethylaminomethyl)- phenol	202-013-9	90-72-2	19th		Xn; R22 Xi; R36/38	>=1.00 - <2.50%
2,2'-dimethyl- 4,4'methylenebis(cyclohexyla mine)	229-962-1	6864-37-5	22nd		T; R23/24 Xn; R22 C; R35 N; R51, R53	>=75.00 - <100.00%
N-(3- (Trimethoxysilyl)propyl)ethyl enediamine	217-164-6	1760-24-3			Xi; R41 R43	>=2.50 - <5.00%

For components with an occupational threshold limit value see chapter 8.

If multiple components with identical identifiers appear, these have different hazardous properties, e.g. flashpoint.

3. HAZARDS IDENTIFICATION

Hazardous components :

2,2'-dimethyl-4,4'methylenebis(cyclohexylamine) N-(3-(Trimethoxysilyl)propyl)ethylenediamine

R-phrase(s) : HARMFUL IF SWALLOWED. TOXIC BY INHALATION AND IN CONTACT WITH SKIN. CAUSES SEVERE BURNS.

This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

SIGMA NOVAGUARD 200/840 (SIGMA NOVAGUARD) HARDENER

ENVIRONMENT.	ISMS, MAY CAUSE LONG-TERM ADVERSE EFFECTS IN THE AQUATIC
RST AID MEASURES	
General advice	: When symptoms persist or in all cases of doubt seek medical advice. Never give anything by mouth to an unconscious person.
Eye contact	 Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice.
Skin contact	 Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Inhalation	 Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice.
Ingestion	 If accidently swallowed obtain immediate medical attention. Keep at rest. Do not induce vomiting.
Burns	 If spills on clothing catch fire, wash with plenty of water. Remove loose clothing. Do not remove clothing that has melted to the skin.Obtain medical attention.
RE-FIGHTING MEASURES	
Specific hazards during fire fighting	: As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains or water courses.
Specific hazards during fire fighting Special protective equipment	dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from

SIGMA COATINGS

7. HANDLING AND STORAGE

Handling		
Safe handling advice	:	Avoid exceeding of the given occupational exposure limits (see section 8). Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application area. Avoid inhalation of vapour or mist. For personal protection see section 8.
Advice on protection against fire and explosion	:	Prevent the creation are section of Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. When transferring from one container to another apply earthing measures and use conductive hose material. No sparking tools should be used. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. No smoking. The accumulation of contaminated rags and dry overspray, particularly in spray booth filters, may result in spontaneous combustion. Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.
Storage		
Requirements for storage areas and containers	:	Observe label precautions. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and 25° C (41 - 77 F) in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No
		smoking. Store in accordance with the particular national regulations (see section 15).

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Minimum ventilated air quantity for 1 liter of product

TO REACH 10 % LEL : 22 m3/l

Components on the national list and/or the European TLV list (98/24/EC):

Components	CAS-No.	Value [mg/m ³]	Value [ppm]	Basis
Personal protective equipment				
General advice				
Respiratory protection	booth, ventilation vapour in all case fed respirator dur	is unlikly to s. In such cire ng the sprayi	be sufficie cumstances ng process	have to work inside the spray nt to control particulates and solvent s they should wear a compressed air- and until such time as the tion has fallen below the exposure

DS EU 01 / EN Version 1	Print Date 3/ Revision date 1	
Hand protection	 For prolonged or repeated contact use protective gloves. Barrier creams may help to protect the exposed areas of skin, they shoul however not be applied once exposure has occurred. Skin should be washed after contact. Use chemical resistant gloves classified under Standard EN 374: Protect gloves against chemicals and micro-organisms. Recommended gloves: butyl-rubber Minimum breakthrough time: 480 min 	
	The recommended gloves are based on most common solvent in this pro- When prolonged or frequently repeated contact may occur, a glove with protection class of 6 (breakthrough time greater than 480 minutes accord to EN 374) is recommended. When only brief contact is expected, a glov with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. NOTICE: The selection of a specific glove for a particular application a duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which ma handled,physicalrequirements (cut/puncture protection, dexterity, therm protection), potential body reactions to glovematerials, as wellas the	a ling ve nd ny be
Eye protection Skin and body protection	 instructions/specifications provided by the glove supplier. Chemical resistant goggles must be worn. Personnel should wear protective clothing. Skin should be washed after contact. Working clothes must not consist of textiles, which show a dangerous melting behaviour in case of fire. Workers should wear antist footwear. 	atic
Additional advice		
Environmental protection	: Refer to national regulations in chapter 15 for regulations on environme protection.	ntal
Personal protection Protective equipment	: P3A3 full-face combi mask, safety gloves, safety suit and boots	

9. PHYSICAL AND CHEMICAL PROPERTIES

Form	:	liquid
Colour	:	various
Odour	:	strong amine-like
Flash point	:	106.0 °C
•		Note: Calculated
Autoignition temperature	:	> 426 °C
Upper explosion limit	:	16.27 %(V)
Lower explosion limit	:	1.64 %(V)
Density	:	0.96 g/cm3
-		at 20 °C
Water solubility	:	completely soluble
pH	:	
Viscosity, dynamic	:	100 mPa.s at 23 °C

10. STABILITY AND REACTIVITY

This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

SIGMA NOVAGUARD 200/840 (SIGMA NOVAGUARD) HARDENER

MSDS EU 01 / EN Version 1

Print Date 3/28/2007 Revision date 17-03-07

Conditions to avoid	:	Avoid temperatures above 60°C (140 F), direct sunlight and contact with sources of heat.
Hazardous reactions	:	Keep away from oxidising agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.
Hazardous decomposition products	:	In case of fire hazardous decomposition products may be produced such as: Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), dense black smoke.

11. TOXICOLOGICAL INFORMATION

Acute oral toxicity	: May cause nausea, abdominal spasms and irritation of the mucous membranes.
Acute inhalation toxicity	: Exposure to component solvent vapours concentration in excess of the stated occupational exposure limit may result in adverse health effects. Such as: mucous membrane irritation, respiratory system irritation, adverse effects on kidney, liver and central nervous system. Symptoms and signs: headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases loss of consciousness.
Skin irritation	: Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in desiccation of the skin. The product may be absorbed through the skin.
Eye contact	: May cause irreversible eye damage.

Further information : There is no data available for this product.

15. REGULATORY INFORMATION

The product is classified and labelled in accordance with Directive 1999/45/EC.

Hazardous components which must be listed on the label:

- 2,2'-dimethyl-4,4'methylenebis(cyclohexylamine)
- N-(3-(Trimethoxysilyl)propyl)ethylenediamine

This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

Print Date 3/28/2007 Revision date 17-03-07

SIGMA COATINGS

R-phrase(s)	: R22 R23/24 R35 R43 R51/53	Harmful if swallowed. Toxic by inhalation and in contact with skin. Causes severe burns. May cause sensitization by skin contact. Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
S-phrase(s)	: S23	Do not breathe spray.
	S26	In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
	\$36/37/39	Wear suitable protective clothing, gloves and eye/face protection.
	S38	In case of insufficient ventilation, wear suitable respiratory equipment.
	S45	In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible).
	S61	Avoid release to the environment. Refer to special instructions/safety data sheets.

The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

National legislation

16. OTHER INFORMATION

Explanation of R-phrases mentioned in section 2				
benzyl alcohol	R20/22	Harmful by inhalation and if swallowed.		
methanol	R11 R23/24/25 R39/23/24/25	Highly flammable. Toxic by inhalation, in contact with skin and if swallowed. Toxic: danger of very serious irreversible effects through inhalation, in contact with skin and if swallowed.		
2,4,6-tris-(dimethylaminomethyl)-phenol	R22 R36/38	Harmful if swallowed. Irritating to eyes and skin.		
2,2'-dimethyl- 4,4'methylenebis(cyclohexylamine)	R22 R23/24 R35 R51/53	Harmful if swallowed. Also toxic by inhalation and in contact with skin. Causes severe burns. Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.		
N-(3- (Trimethoxysilyl)propyl)ethylenediamine	R41 R43	Risk of serious damage to eyes. May cause sensitization by skin contact.		

Version: 1

Revision date 17.03.2007

SIGMA NOVAGUARD 200/840 (SIGMA NOVAGUARD) HARDENER

MSDS EU 01 / EN Version 1

Print Date 3/28/2007 Revision date 17-03-07

The information contained in this safety data sheet is based on the present state of knowledge and current European and National legislation at the date of issue. The supplier reserves the right to modify data on the safety data sheet without further notice. Any change in data will normally be followed by the issue of a new safety data sheet. The user should check the date of issue and if more than 12 months have elapsed, then the data should only be used after checking with the nearest sales office of the supplier to establish that the data is still valid. As the specific conditions of use of the product are outside the suppliers control, the supplier is not reponsible for the (negative) consequences of these specific conditions of use, which are outside of the suppliers. control and which are not compliant with the handling, storage and other instructions in this safety data sheet.

After all component(s) stated on the relevant Technical Data Sheet have been mixed the safety precautions mentioned on each of the component(s) safety data sheets and labels should be used in assessing the safety precautions of the mixed product.

For further information see technical data sheet number: 7462/7468
