

SIGMA THINNER 21-22

Version 1

Print Date Dec 2002

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND THE COMPANY/UNDERTAKING

Product	information

Trade name	: 0122 SIGMA THINNER 21-22
Company	: Sigma Paints Saudi Arabia Ltd. P.O. Box 7509 Dammam 31472
Telephone	: +966 3 847 3100
Telefax	: +966 3 847 1734
Emergency telephone number	: +966 3 857 2394

2. COMPOSITION/INFORMATION ON INGREDIENTS

Components	CAS-No.	Symbol(s):	R-phrase(s)	Concentration
SOLVENT NAPHTHA (PETROLEUM), LIGHT	64742-95-6	Xn, N	R10, R51/53,	50.00 - 100.00%
AROM.			R65, R37	

3. HAZARDS IDENTIFICATION

Hazardous components : SOLVENT NAPHTHA (PETROLEUM), LIGHT AROM.

R-phrase(s) : FLAMMABLE. HARMFUL: MAY CAUSE LUNG DAMAGE IF SWALLOWED. IRRITATING TO RESPIRATORY SYSTEM.

S-phrase(s) : In case of insufficient ventilation, wear suitable respiratory equipment. If swallowed, do not induce vomiting: seek medical advice immediately and show this container or label. Do not breathe spray.

4. FIRST AID MEASURES

General advice	: When symptoms persist or in all cases of doubt seek medical advice. Never give anything by mouth to an unconscious person.
Eye contact	: Irrigate copiously with clean, fresh water for at least 10 minutes, holding the eyelids apart. Remove contact lenses. Seek medical advice.
Skin contact	 Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners.
Inhalation	 Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice.
Ingestion	: If accidently swallowed obtain immediate medical attention. Keep at rest. Do not induce vomiting.

SIGMA THINNER 21-22

Version 1

Print Date Dec 2002

5. FIRE-FIGHTING MEASURES

Specific hazards during fire fighting	:	As the product contains cumbustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains or water courses.
Special protective equipment for fire-fighters	:	In the event of fire, wear self-contained breathing apparatus.
Suitable extinguishing media	:	Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Keep containers and surroundings cool with water spray.
Extinguishing media which must not be used for safety reasons	:	Do NOT use water jet.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions	1	Use personal protective equipment. Ventilate the area. Refer to protective measures listed in sections 7 and 8. Wear respiratory protection. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. Remove all sources of ignition.
Environmental precautions		Try to prevent the material from entering drains or water courses. If the product contaminates rivers and lakes or drains inform respective authorities.
Methods for cleaning up	:	Clean with detergents. Avoid solvents. Contain and collect spillage with non- combustible absorbent material, (e.g. sand, earth, diatomaceus earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).
Additional advice	:	Refer to section 15 for specific national regulation.

7. HANDLING AND STORAGE

Handling	
Safe handling advice	: Avoid exceeding of the given occupational exposure limits (see section 8). Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application area. Avoid inhalation of vapour or mist. For personal protection see section 8.
Advice on protection against fire and explosion	Prevent the creation of flammable or explosive concentrations of vapour in air and avoid vapour concentration higher than the occupational exposure limits. When transferring from one container to another apply earthing measures and use conductive hose material. No sparking tools should be used. The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. No smoking. The accumulation of contaminated rags and dry overspray, particularly in spray booth filters, may result in spontaneous combustion. Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.
Storage	
Requirements for storage areas and containers	: Observe label precautions. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and 25°C in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technocological safety standards. Keep away from sources of ignition - No smoking. Store in accordance with the particular national regulations (see section 15).

Personal protection advice	:	measures lis vapours acci	ted in sections umulating to fo	7 and 8. Wear orm explosive	respiratory concentratio	a. Refer to protective protection. Beware of ons. Vapours can
Respiratory protection	 accumulate in low areas. Remove all sources of ignition. Apply technical measures to comply with the occupational exposure limits. This should be achieved by a good general extraction and "if practically feasible" by the use of local exhaust ventilation. If the occupational exposure limits cannot be met, in exceptional cases suitable respiratory equipment should be worn only for a short period of time. 					
Hand protection	 should be worn only for a short period of time. For prolonged or repeated contact use protective gloves. Barrier creams may help to protect the exposed areas of skin, they should however not be applied once exposure has occurred. Skin should be washed after contact. 					
Eye protection Skin and body protection	:	Chemical re- Personnel sh contact. Wor	sistant goggles hould wear prot rking clothes m	must be worn ective clothin ust not consis	g. Skin shou st of textiles,	Ild be washed after , which show a s should wear antistatic

Form	:	liquid

Density	:	0.8 g/cm3
Water solubility	:	immiscible

SAFETY DATA SHEET acc	Fording to EC directive 93/112/EC
IGMA THINNER 21-22 ersion 1	Print Date Dec 2002
Viscosity, dynamic	: 50 mPa.s at 23 °C
. STABILITY AND REACTIVITY	
Conditions to avoid	: Avoid temperatures above 60°C, direct sunlight and contact with sources of heat.
Hazardous reactions	: Keep away from oxidising agents, strongly alkaline and strongly acid
Hazardous decomposition products	 materials in order to avoid exothermic reactions. In case of fire hazardous decomposition products may be produced such as: Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), dense black smoke.
TOXICOLOGICAL INFORMATIO	N
Acute oral toxicity	: May cause nausea, abdominal spasms and irritation of the mucous membranes.
Acute inhalation toxicity	 Exposure to component solvent vapours concentration in excess of the stated occupational exposure limit may result in adverse health effects. Such as: mucous membrane irritation, respiratory system irritation, adverse effects on kidney, liver and central nervous system. Symptoms and signs: headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases loss of consciousness.
Skin irritation	 Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in desiccation of the skin. The product may be absorbed through the skin.
Eye contact Further information	The liquid splashed in the eyes may cause irritation and reversible damage.There is no data available for this product.
. ECOLOGICAL INFORMATION	
Further information	: There is no data available for this product.
. DISPOSAL CONSIDERATIONS	
Product	: The product should not be allowed to enter drains, water courses or the soil. Disposal together with normal waste is not allowed. Special disposal required according to local regulations.

16. OTHER INFORMATION

Explanation of R-phrases mentioned in section 2

SOLVENT NAPHTHA (PETROLEUM), LIGHT AROM.	R10 R51/53	Flammable. Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.
	R65 R37	Harmful: may cause lung damage if swallowed. Irritating to respiratory system.

Changes since the last version will be highlighted in the margin. This version replaces all previous versions.

The information contained in this safety data sheet is based on the present state of knowledge and current national legislation at the date of issue. The company reserves the right to modify data without notice. Any change in data will normally be followed by issue of a new safety data sheet. The user should check the date of issue and if more than 12

months have elapsed, then the data should only be used after checking with our nearest sales office to establish that they are still valid. As the specific conditions of use of the product are outside the suppliers control, the user is responsible for ensuring that the requirements of relevant legislation are complied with. None of the information contained in this safety data sheet can be constructed as a guarantee with regard to the properties of the product described. No liability can be accepted on the basis of this safety data sheet.

After all component(s) stated on the relevant Technical Data Sheet have been mixed the safety precautions mentioned on each of the component(s) safety data sheets and labels should be used in assessing the safety precautions of the mixed product.

For further information see technical data sheet number: 0122
