This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

SIGMAGUARD 750 (SIGMA SILGUARD MC) BINDER

MSDS EU 01 / EN Version 1

Print Date 3/27/2007 Revision date 17-03-07

1. IDENTIFICATION OF THE SUBSTANCE/PREPARATION AND OF THE COMPANY/UNDERTAKING

Product information		
Trade name	:	SIGMAGUARD 750 (SIGMA SILGUARD MC) BINDER
Recommended use	:	solvent based, two component coating hardener
Company	:	SigmaKalon Belgium N.V. Tweemontstraat 104 2100 Deurne-Antwerpen
Telephone	:	+32 3 3606311
Telefax	:	+32 3 3606437
Emergency telephone number	:	+31 20 4075210

2. COMPOSITION/INFORMATION ON INGREDIENTS

Components	EC No.	CAS-No.	DSD	Note	Classification	Concentration
ethanol	200-578-6	64-17-5	19th		F; R11	>=2.50 - <10.00%
methanol	200-659-6	67-56-1	28th		F; R11 T; R23/24/25, R39/23/24/25	>=1.00 - <2.50%
xylene	215-535-7	1330-20-7	25th	Nota C	R10 Xn; R20/21 Xi; R38	>=20.00 - <25.00%
ethylbenzene	202-849-4	100-41-4	19th		F; R11 Xn; R20	>=2.50 - <10.00%
tetraethyl silicate	201-083-8	78-10-4	19th		R10 Xn; R20 Xi; R36/37	>=2.50 - <10.00%
1-methoxy-2-propanol	203-539-1	107-98-2	19th		R10	>=10.00 - <25.00%

For components with an occupational threshold limit value see chapter 8.

If multiple components with identical identifiers appear, these have different hazardous properties, e.g. flashpoint.

3. HAZARDS IDENTIFICATION

Hazardous components : xylene

R-phrase(s) : HIGHLY FLAMMABLE.

This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

MSDS EU 01 / EN Version 1

Print Date 3/27/2007 Revision date 17-03-07

HARMFUL BY INHALATION AND IN CONTACT WITH SKIN. IRRITATING TO SKIN. 4. FIRST AID MEASURES General advice When symptoms persist or in all cases of doubt seek medical advice. Never : give anything by mouth to an unconscious person. Irrigate copiously with clean, fresh water for at least 10 minutes, holding the Eye contact eyelids apart. Remove contact lenses. Seek medical advice. Skin contact Take off all contaminated clothing immediately. Wash skin thoroughly with soap and water or use recognized skin cleanser. Do NOT use solvents or thinners. Inhalation Remove to fresh air. Keep patient warm and at rest. If breathing is irregular or stopped, administer artificial respiration. If unconscious place in recovery position and seek medical advice. Ingestion If accidently swallowed obtain immediate medical attention. Keep at rest. Do not induce vomiting. Burns If spills on clothing catch fire, wash with plenty of water. Remove loose clothing. Do not remove clothing that has melted to the skin.Obtain medical attention. 5. FIRE-FIGHTING MEASURES Specific hazards during fire As the product contains combustible organic components, fire will produce dense black smoke containing hazardous products of combustion (see section fighting 10). Exposure to decomposition products may be a hazard to health. Cool closed containers exposed to fire with water spray. Do not allow run-off from fire fighting to enter drains or water courses. Special protective equipment In the event of fire, wear self-contained breathing apparatus. : for fire-fighters Suitable extinguishing media Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide. Keep containers and surroundings cool with water spray. Extinguishing media which Do NOT use water jet. must not be used for safety reasons 6. ACCIDENTAL RELEASE MEASURES Personal precautions Use personal protective equipment. Ventilate the area. Refer to protective : measures listed in sections 7 and 8. Wear respiratory protection. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. Remove all sources of ignition. **Environmental precautions** Try to prevent the material from entering drains or water ways. If the product contaminates rivers and lakes or drains inform respective authorities. Methods for cleaning up Clean with detergents. Avoid solvents. Contain and collect spillage with noncombustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13). Additional advice Refer to section 15 for specific national regulation.

This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

7. HANDLING AND STORAGE

Handling		
Safe handling advice	:	Avoid exceeding of the given occupational exposure limits (see section 8). Use only in area provided with appropriate exhaust ventilation. Avoid contact with skin, eyes and clothing. Smoking, eating and drinking should be prohibited in the application area. Avoid inhalation of vapour or mist. For personal protection see section 8.
Advice on protection against	:	Prevent the creation of flammable or explosive concentrations of vapour in
fire and explosion		air and avoid vapour concentration higher than the occupational exposure limits. When transferring from one container to another apply earthing measures and use conductive hose material. No sparking tools should be used. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). The product should only be used in areas from which all naked lights and other sources of ignition have been excluded. No smoking. The accumulation of contaminated rags and dry overspray, particularly in spray booth filters, may result in spontaneous combustion. Good housekeeping standards, regular safe removal of waste materials and regular maintenance of spray booth filters will minimise the risks of spontaneous combustion and other fire hazards.
Storage		
Requirements for storage areas and containers	:	Observe label precautions. Prevent unauthorized access. Containers which are opened must be carefully resealed and kept upright to prevent leakage. Store between 5 and 25° C (41 - 77 F) in a dry, well ventilated place away from sources of heat, ignition and direct sunlight. Solvent vapours are heavier than air and may spread along floors. Vapours may form explosive mixtures with air. Electrical installations / working materials must comply with the technological safety standards. Keep away from sources of ignition - No smoking. Store in accordance with the particular national regulations (see section 15).
Advice on common storage	:	Keep away from oxidising agents and strongly acid or alkaline materials.
8		

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

Minimum ventilated air quantity for 1 liter of product

TO REACH 10 % LEL : 115 m3/l

Components on the national list and/or the European TLV list (98/24/EC):

Components	CAS-No.	Value [mg/m ³]	Value [ppm]	Basis
methanol can be absorbed through skin	67-56-1	260	200	EU ELV TWA
xylene can be absorbed through skin	1330-20-7	221 442	50 100	EU ELV TWA EU ELV STEL
ethylbenzene can be absorbed through skin	100-41-4	442 884	100 200	EU ELV TWA EU ELV STEL
1-methoxy-2-propanol can be absorbed through skin	107-98-2	375 568	100 150	EU ELV TWA EU ELV STEL

Personal protective equipment

This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

D • • • • • •		
Respiratory protection	:	When operators, whether spraying or not, have to work inside the spray booth, ventilation is unlikly to be sufficient to control particulates and solver vapour in all cases. In such circumstances they should wear a compressed ai fed respirator during the spraying process and until such time as the particulates and solvent vapour concentration has fallen below the exposure limits.
Hand protection	:	For prolonged or repeated contact use protective gloves. Barrier creams may help to protect the exposed areas of skin, they should however not be applied once exposure has occurred. Skin should be washed after contact. Use chemical resistant gloves classified under Standard EN 374: Protective
		gloves against chemicals and micro-organisms.
		Recommended gloves: Viton
		Minimum breakthrough time: 480 min
		The recommended gloves are based on most common solvent in this produc
		When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may b handled,physicalrequirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove supplier.
Eye protection Skin and body protection	:	Chemical resistant goggles must be worn. Personnel should wear protective clothing. Skin should be washed after contact. Working clothes must not consist of textiles, which show a dangerous melting behaviour in case of fire. Workers should wear antistatic footwear.
Additional advice		
Additional advice Environmental protection	:	Refer to national regulations in chapter 15 for regulations on environmental protection.

Please contact your personal protection equipment supplier for further advice

9. PHYSICAL AND CHEMICAL PROPERTIES

Form	: liquid
Colour	:
Odour	: mild aromatic
Flash point	: 12.4 °C
Autoignition temperature	: $> 270 \ ^{\circ}C$
Upper explosion limit	: 9.78 %(V)
Lower explosion limit	: 1.27 %(V)
Density	: 1.14 g/cm3
	at 20 °C
Water solubility	: partly miscible

This safety data sheet is prepared in accordance with EU directive 91/155/EC amended by directive 2001/58/EC.

SIGMAGUARD 750 (SIGMA SILGUARD MC) BINDER

MSDS EU 01 / EN Version 1

Print Date 3/27/2007 Revision date 17-03-07

	Revision date 17-03-07
pH Viscosity, dynamic Flow time	: : 14 s at 23 °C Method: DIN 53211 DIN 4 CUP
Flow time	: 59 s Transversal section: 4 mm Method: ISO 2431 (EN 535) 4 mm CUP
STABILITY AND REACTIVITY	
Conditions to avoid	: Avoid temperatures above 60°C (140 F), direct sunlight and contact with
Hazardous reactions	 sources of heat. Keep away from oxidising agents, strongly alkaline and strongly acid materials in order to avoid exothermic reactions.
Hazardous decomposition products	 In case of fire hazardous decomposition products may be produced such as: Carbon dioxide (CO2), carbon monoxide (CO), oxides of nitrogen (NOx), dense black smoke.
	ION
Acute oral toxicity	: May cause nausea, abdominal spasms and irritation of the mucous membranes.
Acute inhalation toxicity	 Exposure to component solvent vapours concentration in excess of the stated occupational exposure limit may result in adverse health effects. Such as: mucous membrane irritation, respiratory system irritation, adverse effects on kidney, liver and central nervous system. Symptoms and signs: headache, dizziness, fatigue, muscular weakness, drowsiness and in extreme cases loss of consciousness.
Skin irritation	 Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in desiccation of the skin. The product may be absorbed through the skin.
Eye contact Further information	 The liquid splashed in the eyes may cause irritation and reversible damage. There is no data available for this product.
Acute Toxicity Data for Compo	nents
ECOLOGICAL INFORMATION	
Further information	: The preparation has been assessed following the conventional method of the Dangerous Preparations Directive 1999/45/EC and is not classified as dangerous for the environment. See section 2 for details on components.
. DISPOSAL CONSIDERATION	3
Product	: The product should not be allowed to enter drains, water courses or the soil. Disposal together with normal waste is not allowed. Special disposal required according to local regulations.

The information contained in this safety data sheet does not constitute the user's own assessment of workplace risks, as required by other health and safety legislation. The provisions of the national health and safety at work regulations apply to the use of this product at work.

National legislation

16. OTHER INFORMATION

Explanation of R-phrases mentioned in section 2

ethanol	R11	Highly flammable.
methanol	R11 R23/24/25 R39/23/24/25	Highly flammable. Toxic by inhalation, in contact with skin and if swallowed. Toxic: danger of very serious irreversible effects through inhalation, in contact with skin and if swallowed.
xylene	R10 R20/21 R38	Flammable. Harmful by inhalation and in contact with skin. Irritating to skin.
ethylbenzene	R11 R20	Highly flammable. Harmful by inhalation.
tetraethyl silicate	R10 R20 R36/37	Flammable. Harmful by inhalation. Irritating to eyes and respiratory system.
1-methoxy-2-propanol	R10	Flammable.

Version: 1

Revision date 17.03.2007

The information contained in this safety data sheet is based on the present state of knowledge and current European and National legislation at the date of issue. The supplier reserves the right to modify data on the safety data sheet without further notice. Any change in data will normally be followed by the issue of a new safety data sheet. The user should check the date of issue and if more than 12 months have elapsed, then the data should only be used after checking with the nearest sales office of the supplier to establish that the data is still valid. As the specific conditions of use of the product are outside the suppliers control, the supplier is not reponsible for the (negative) consequences of these specific conditions of use, which are outside of the suppliers. control and which are not compliant with the handling, storage and other instructions in this safety data sheet.

After all component(s) stated on the relevant Technical Data Sheet have been mixed the safety precautions mentioned on each of the component(s) safety data sheets and labels should be used in assessing the safety precautions of the mixed product.

For further information see technical data sheet number: 7551
